## WORK EXPERIENCE

**Product Operations Analyst**                                    Aug 2018-Present

**Irdeto**                                                        Los Angeles, CA

- Developed software programs (Java) which automated a large part of my team's workflow.
- Developed software (Python) for crawling the internet for infringing video content
- Automated the process of scheduling live event coverage by writing a script to access and read league APIs.
- Worked effectively in an Agile environment by sharing feedback and innovative ideas during bi-weekly design reviews and review sessions.

**Business Analyst**                                             Sep 2013 – Jun 2016

**Parah International FZCO**                                      Dubai, U.A.E.

- Used MS Excel to maintain records and generate KPI reports.
- Generated invoices and reports for client's and company's records.
- Involved in project planning and coordination.

**Intern**                                                       Jun 2013-Aug 2013

**Taprogge GmbH**                                                Wetter, Germany

- Maintained and analyzed data using MS Excel & the company database.
- Assisted supervisor and engineers in electronic design of power and control systems.
- Applied my knowledge of electrical systems to test electrical panels & assemblies.
